

Harvest of the Month

FUN FACTS:

There are 2,500 varieties of apples in the U.S. and over 7,500 varieties throughout the world. The crabapple is the only apple native to North America.

Apples range in size from as small as a cherry to as big as a grapefruit. The largest apple ever picked weighed 3 pounds!

Eat the peel too! Many of the valuable nutrients are in the skin or just under the skin.

To make one gallon of apple cider, you need about 36 apples. To make a 9-inch pie, you need 2 pounds.

This institution is an equal opportunity provider.
